Sarah Lasaracina

Technical writer | UX & Prompt design | Product design |
Cybersecurity | Hospitality Saas
Bari, Apulia, Italy

Summary

I'm a content and UX professional with 9+ years of experience across technical writing, content strategy, UX design, and conversation design. I design clear communication systems for complex digital products, turning technical and operational complexity into usable content, intuitive interfaces, and scalable guidance. My background spans cybersecurity, healthcare, finance, CRM, industrial automation, and hospitality AI. Recently, I designed the Alfred Hospitality AI platform end to end, owning the UX across the full lifecycle, from user research and journeys to interaction design, usability testing, subscription flows, and documentation. Platform: <https://alfredco.host/> Documentation: <https://docs.alfredco.host/> I built the assistant around the real needs of hospitality operations, with particular attention to service workflows and legal and operational requirements in Italy. I worked closely with frontend and backend engineers to translate product decisions into production-ready solutions. At Transmit Security, I focus on developer documentation for APIs, SDKs, orchestration flows, integrations, and automation scenarios, with strong attention to clarity, structure, and usability. I'm particularly interested in AI-driven products, communication strategy, knowledge systems, and roles that sit between product, UX, and content.

Experience

Transmit Security

Technical Writer

September 2023 - Present (2 years 10 months)

Tel Aviv District, Israel

At Transmit Security, I own developer-focused documentation for the Mosaic identity platform, covering authentication and identity orchestration, API integrations, SDK implementations (Web, iOS, Android), and security workflows.

I document complex IAM capabilities such as OAuth/OIDC flows, SSO integrations, passkeys, risk-based authentication, identity verification, and journey-based orchestration combining client-side and backend steps.

My work includes creating concepts, implementation guides, API references, step documentation, and end-to-end tutorials that help developers and architects design secure authentication experiences. I work hands-on with the product, validating flows, testing configurations, and collaborating closely with Engineering, Product, and UX teams.

I contribute through a Docs-as-Code workflow using Markdown, Git/GitHub, reviews, and automated publishing pipelines, with a focus on reusable patterns, clear architecture guidance, and documentation that improves developer experience and product adoption.

Alfred Hospitality AI

User Experience Designer/Product Owner

October 2023 - Present (2 years 9 months)

Remote

I proudly designed and delivered the Alfred Hospitality AI platform end to end, owning the UX across the entire product lifecycle. Product: <https://alfredco.host/>

I led the UX design process, including user research, definition of user journeys, interaction design, and visual design. I coordinated and oversaw usability testing, translating insights into iterative product improvements.

I designed the financial and subscription flows, including end-to-end transaction journeys for payments and recurring subscriptions.

Throughout delivery, I worked closely with frontend and backend engineers, coordinating implementation to ensure alignment between UX, functional requirements, and technical constraints.

I also authored and maintained the product and technical documentation, available at:

<https://docs.alfredco.host/>

Botique.me

Founder | CIO | Product manager | Scrum master

October 2023 - Present (2 years 9 months)

Estonia

I thrive at the intersection of innovation, collaboration, and adaptability. While my background may not scream "Product Manager" or "Scrum Master" on paper, my journey in the realm of Information Technology has equipped me with a diverse set of skills that I passionately apply at Botique.me.

- Scrum Events Coordination: facilitating and coordinating Scrum events, ensuring effective communication and collaboration within the team.
- Roadmap Definition: developing and defining the product roadmap, aligning it with the strategic vision of Botique.me.
- Operational Framework: establishing and refining operational processes to enhance efficiency and streamline workflows.
- Product Requirements Definition: leading the definition of comprehensive product requirements, ensuring alignment with business goals and user needs.
- Design Decision-Making: taking a hands-on approach in making design decisions that contribute to the overall user experience and product excellence.
- Documentation and UI Copy: managing the documentation process and crafting UI copy, maintaining a cohesive and user-friendly product interface.
- Social Media Presence: actively contributing to building the startup's social media presence, acknowledging room for improvement, and exploring strategies to enhance engagement.

Empathy.co

Senior Technical Writer

November 2022 - May 2023 (7 months)

Remote

- Leading the development and upkeep of user-friendly documentation for Empathy Platform (Empathy.co's eDocs), covering both functional and technical aspects.
- Managing creation, revision, and proofreading of internal backend API documentation using Confluence, Backstage, Postman, and Swagger.
- Orchestrating documentation projects in Agile settings, actively engaging in Scrum events and collaborating with software engineers through JIRA and Confluence.
- Implementing seamless content versioning and publication workflows with Markdown and GitHub.

- Spearheading knowledge management initiatives across documentation channels.
- Contributing to termbase maintenance and ensuring style guide adherence.
- Providing support in UI writing and offering insights into UX design.
- Crafting concise release notes and overseeing internal weekly updates for effective team communication.
- Collaborating in cross-functional teams, actively participating in content and design reviews.

Writec

Technical communicator

January 2021 - November 2022 (1 year 11 months)

Remote

- Creating functional, technical, and API software documentation for diverse industries including industrial automation, printing machinery, and finance.
- Designing and publishing multi-support content using MadCap Flare.
- Managing content versioning through GitHub.
- Designing and consulting on knowledge management strategies.
- Applying information mapping and plain language writing techniques.
- Providing consulting on terminology and style guide adherence.
- Offering support in interaction and UX design.
- Conducting peer-to-peer content reviews for continuous improvement.

Cerner Corporation

Technical Writer

April 2018 - January 2021 (2 years 10 months)

Région de Paris, France

- Leading user-centered documentation development projects.
- Writing and overseeing installation, setup, maintenance, and user documentation for PowerStay, a healthcare administrative and financial data management software (Atlassian Confluence Wiki) and its Web Services.
- Managing documentation databases, ensuring information architecture, style guide adherence, and overall compliance.
- Monitoring and analyzing technical specifications and test cases, collaborating closely with developers and solution designers to address evolutions and bugs.
- Collaborating with UX/UI solution designers on interface improvement projects, focusing on textual and visual user-centered redesign.
- Communicating with customers regarding new software releases, incidents, and other relevant updates.

dimelo

Product Expert

September 2017 - April 2018 (8 months)

Région de Paris, France

- Supporting French and global customers in utilizing SaaS B2C Customer Relationship Management platforms, Dimelo Digital and Dimelo Communities, including statistics, customization, configuration, and user training.
- Formalizing client requests, evaluating their impacts on the product, and defining roadmaps in collaboration with WebFactory and R&D.
- Collaborating with R&D in designing new features and interfaces, participating in testing and bug fixes.
- Writing and translating (ENG <> FR) installation and user documentation, HelpCenter articles, client training materials, newsletters, incident alerts, etc.

SFR Business

Project management intern

September 2016 - September 2017 (1 year 1 month)

Campus SFR Saint Denis

- Managing and optimizing the documentation archive for B2B offers (IoT, international mobile, landline, and convergent telephony) utilized by Customer Service operators.
- Crafting technical and marketing documentation to enhance communication and understanding.

Discovery Publishers

Traducteur/relecteur

February 2013 - January 2016 (3 years)

à distance

- Translating from English and French to Italian for independent book publications focusing on historical and cultural interests.
- Providing thorough proofreading to ensure linguistic precision and quality.
- Specializing in terminology management and conducting linguistic research to maintain historical accuracy and cultural context.

New York Habitat

Traducteur/relecteur

February 2014 - May 2014 (4 months)

à distance

- Translating and localizing tourism-oriented blog articles.
- Writing and translating real estate rentals and offers for online platforms.

- Conducting proofreading for accuracy and quality assurance.

CIHEAM-Bari

Traducteur

May 2013 - August 2013 (4 months)

Bari , Italia

- Translating agronomy and computer science press articles, technical documents, and literary publications.
- Translating the book "Le CIHEAM, Une Histoire Méditerranéenne (1962 – 2012)" from French to Italian.
